How to start a business in Greece

Hello & welcome to presentation

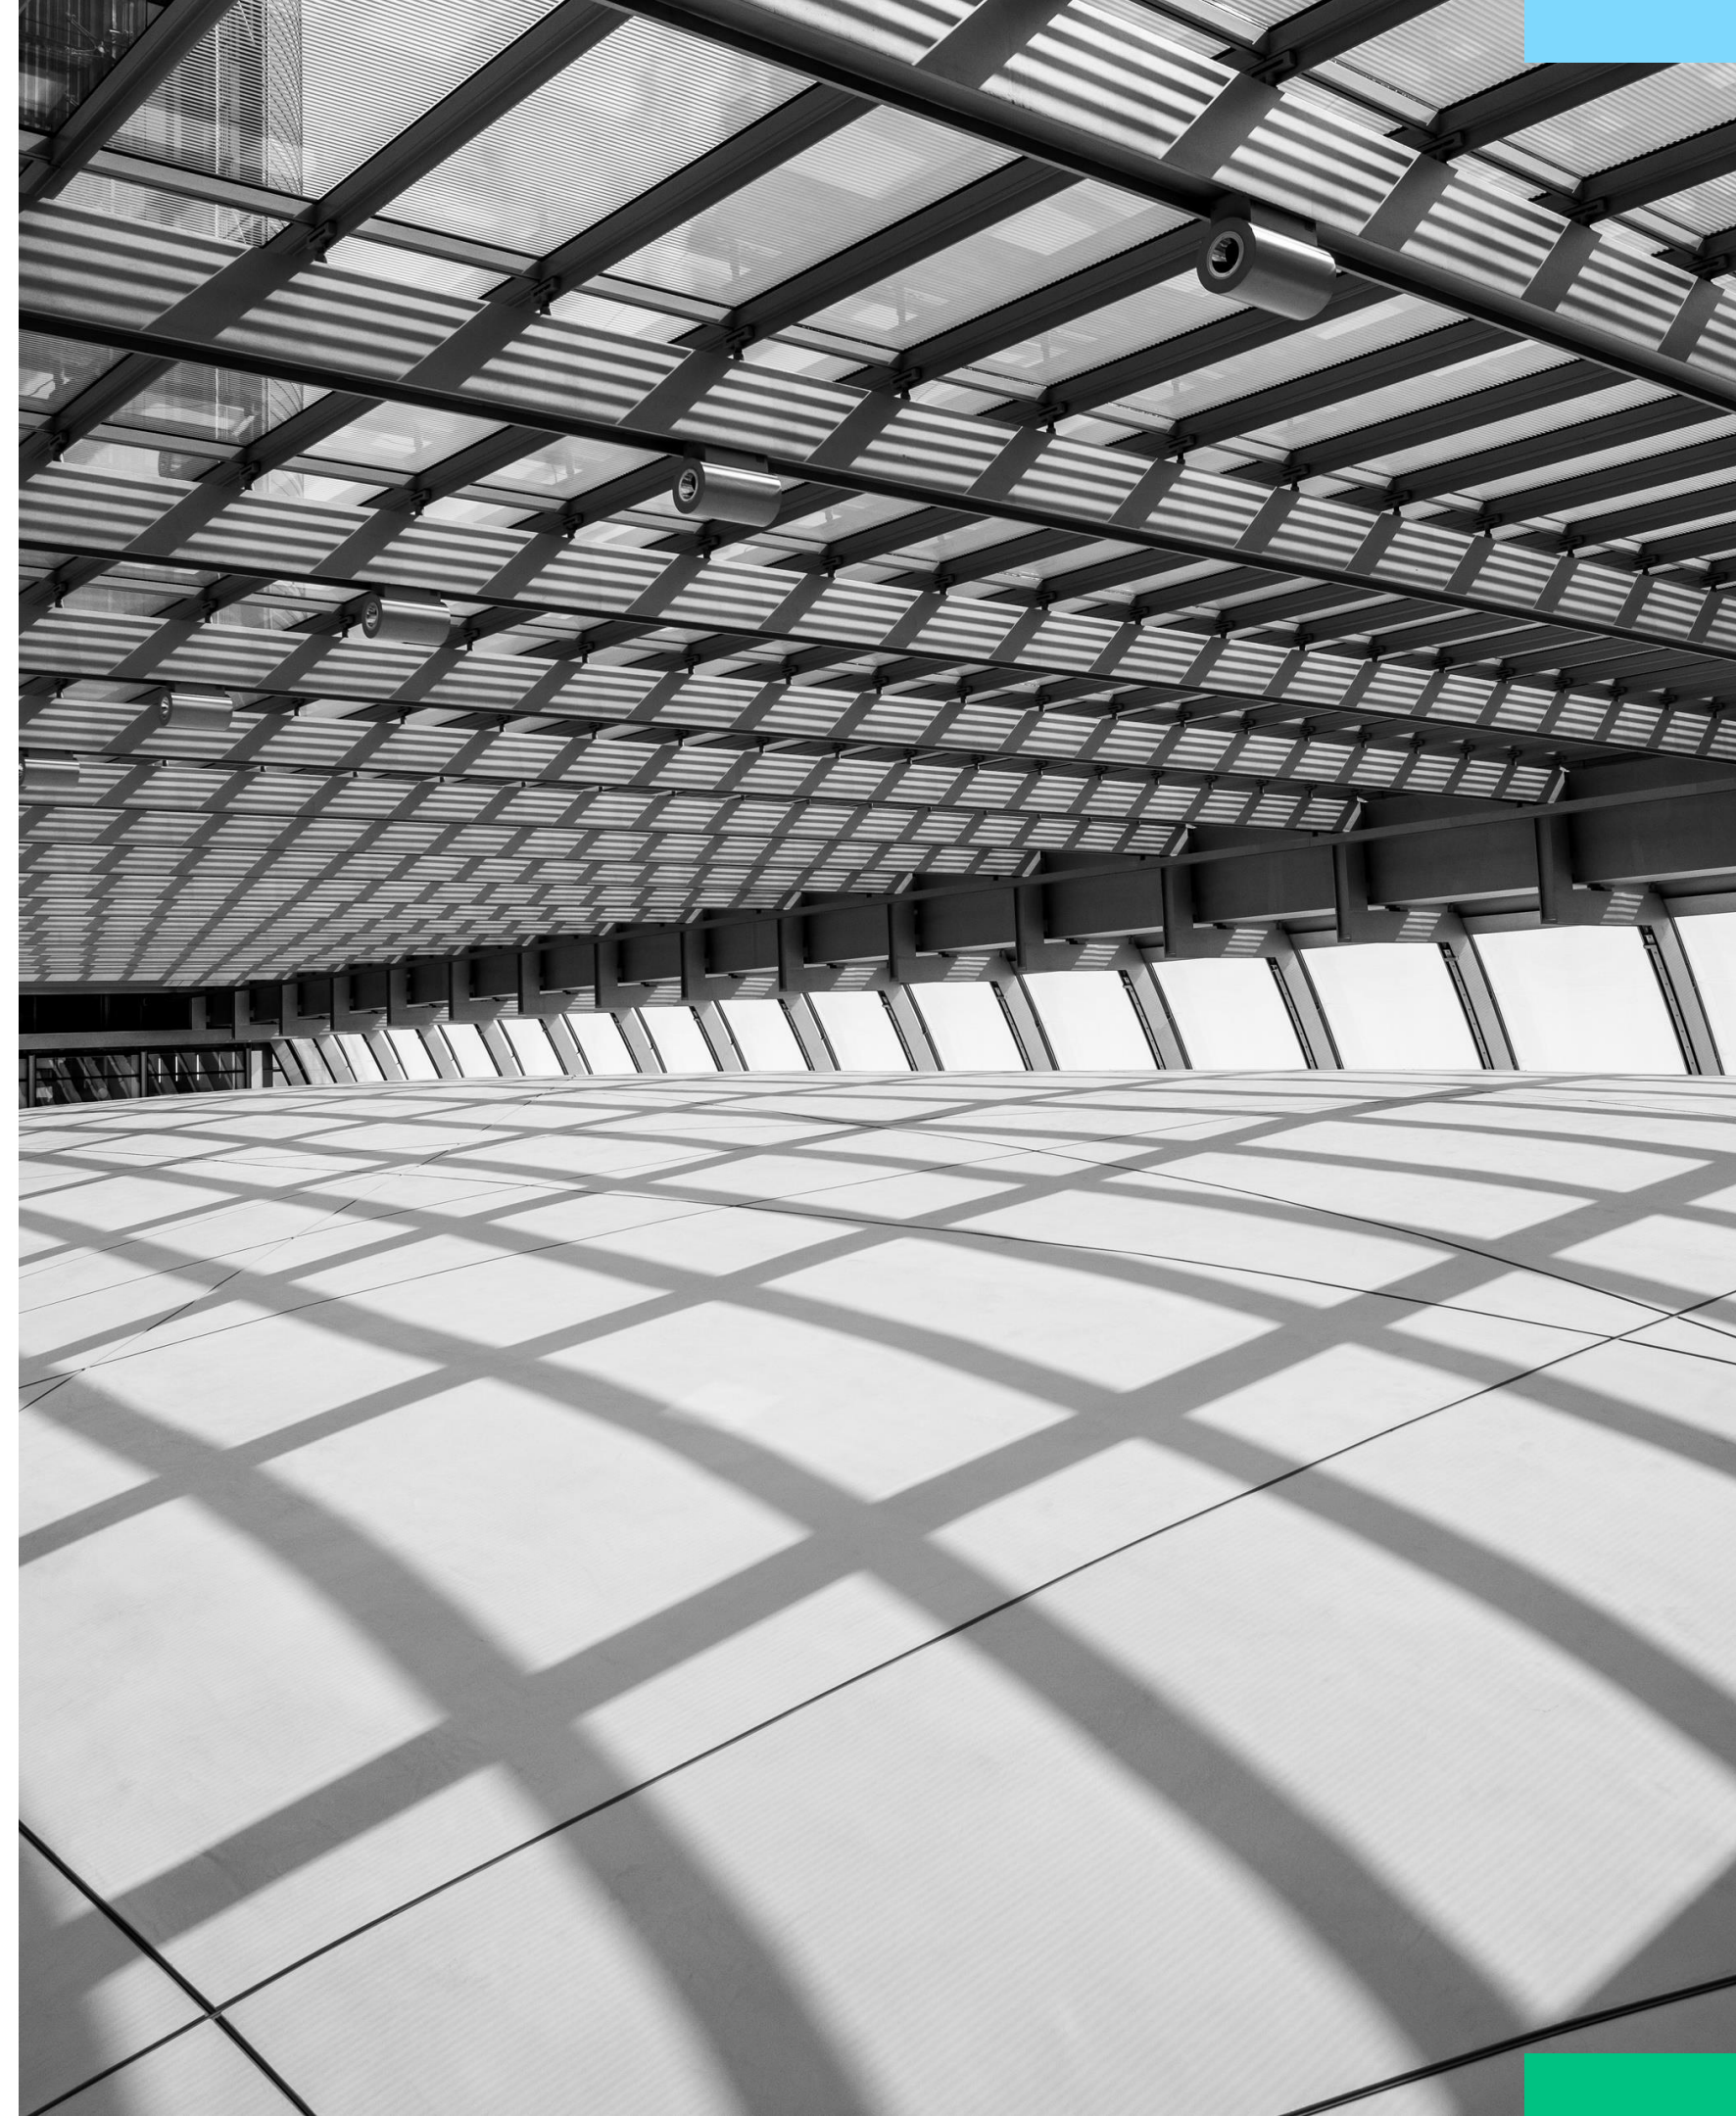

LETS GET STARTED

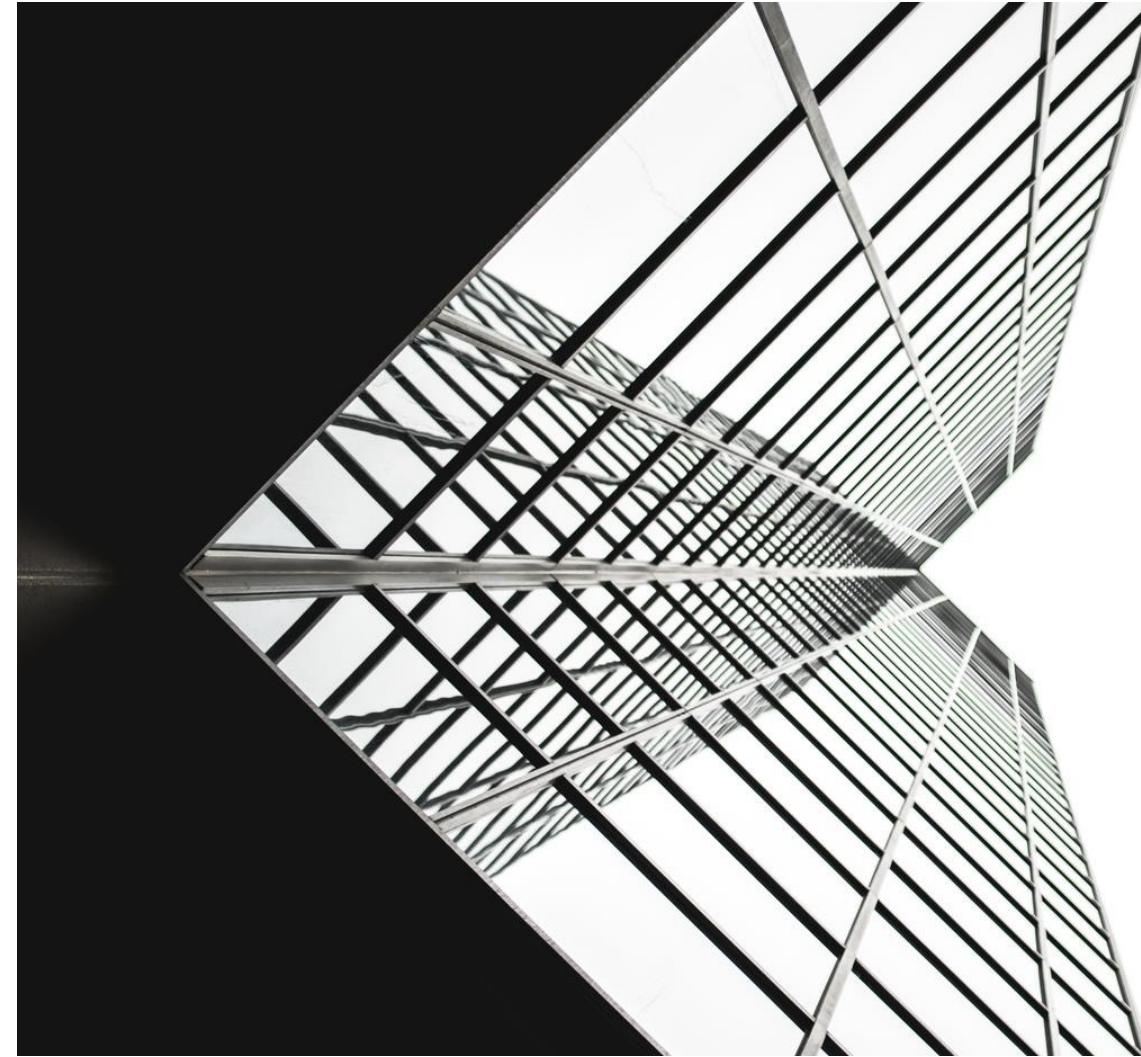

What defines a business?

A business is defined as an organization or enterprising entity engaged in commercial, industrial, or professional activities.

Businesses can be for-profit entities or non-profit organizations. Business types range from limited liability companies to sole proprietorships, corporations, and partnerships.

What are the basics.

THE IDEA

We have to find something that we know well or we are good at

REGISTRATION

Registration of our business to the government

OFFICE

Registration of our business office.

PRODUCTS

Registration of our business products or services

Find a business niche.

First of all we have to do some research and find a business niche that we know and understand well. We can start a business by doing something we love, something people need, something we are good at or something that people will pay us for.

Registration of our business to the Government.

**Then we have to register our business
to the Internal Revenue Services (DOY).**

**To achieve that we can register it
online, or we can arrange a meeting
and submit a folder containing all the
necessary documents.**

Registration of the tax headquarters of our business

After that we have to register the tax headquarters of the company.

It can be an office, a warehouse or even our own house. It completely depends on the type of business we choose.

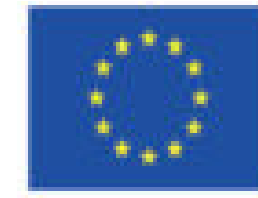

A photograph of a modern glass skyscraper with a grid-like facade, reflected in a body of water. The image is split vertically, with the left half showing the building and the right half containing text on a light blue background.

Registration of our business products or services.

Also we must register our

Business Activity Code

**which is what type of business we have
and what products or services we offer.**
